## Preparation for the electrical certifications of the personnel performing high voltage electrical operations H1V / H2V / HC Initial and refresher courses

Compliant with the NF C 18-510 standard

### OBJECTIVES

Preparing the H1, H1V, H2, H2V, HC certifications in compliance with the NF C 18-510 French norm, approved on December 21, 2011.

Safely carrying out operations on electrical structures.

### AUDIENCE

Personnel working on high voltage electrical structures.

### PREREQUISITES

Having completed the module "Preparation for the electrical certifications of the personnel performing low voltage electrical operations.

### COMPUTER ENVIRONMENT REQUIREMENTS

The use of a helmet is recommended.

PC, laptop or tablet with sound card and multimedia player (video playback).

Internet access by a browser of a recent version.

### PÉDAGOGY

#### TOOLS AND MEANS

##### > Teaching method

E-learning module.

Videos and very realistic 3D animations.

After each chapter, you gain access to a downloadable summary on " key points ". The learner will be able to consult this document whenever necessary.

##### > Technical means

E-learning on a dedicated platform with access by individual code.

### ASSESSMENT

> The learner follows all the chapters and is assessed at the end of the course.

> At the end of the final assessment, a printable certificate is delivered.

> This course must be supplemented, as soon as possible, by face-to-face training with the objective of:

- Check the knowledge acquired or reviewed in Open Distance Learning (FOAD)

- To carry out the practical part, whenever possible, in the learner's usual work environment or failing that through indoor work on representative structures or installations to verify theoretical knowledge and verify the learner's ability to apply the safety requirements in a simulated work environment.

- To carry out the practical and final assessment.

*The renewal of the electrical accreditation is compulsory with a recommended periodicity of 3 years.*

> This training is sanctioned by an individual E-Learning end-of-course certificate.

### PROGRAM

> Chapter 1 - High voltage structures and installations. Knowledge assessment test

### TERMS

**Duration** : 1 h.

**Price** : consult us.

*Access to e-learning training is open for a period of 1 month.*
